

Below are the species available. If you are looking for alternative species, please speak to us as we may be able to grow them too, depending on seed availability. All species are subject to seed availability.

SPECIES	COMMON NAME	NOTES
GRASSES, SEDGES, GROUND FLORA		
<i>Austrostipa verticillata</i>	Slender Bamboo Grass	Common in moist areas, often red soils & deep sands
<i>Cymbopogon refractus</i>	Barbed-wire Grass	Perennial, widespread, free draining soils of lower fertility
<i>Dianella revoluta var. revoluta</i>	Black-anthered Flax-lily	Clumping to spreading perennial, pref. dryish sandy loams
<i>Hardenbergia violacea</i>	False Sarsaparilla	Climbing or prostrate subshrub, widespread various habitats
<i>Lomandra longifolia</i>	Spiny-headed Mat-Rush	Clumping perennial to 1m, variety of soils & habitats
<i>Lomandra glauca</i>	Mat Rush	Clumping perennial 0.5m
<i>Microlaena stipoides</i>	Weeping Grass	Cool season perennial, variety of soils, highly acid tolerant
<i>Themeda australis</i>	Kangaroo Grass	Warm season perennial, variety of well drained soils
<i>Poa labillardierei</i>	Poa Tussock	Cool season long lived coarse perennial
SHRUBS		
<i>Acacia brownii</i>	Prickly Moses	Grows to 1m well drained sandy to clay loams
<i>Acacia buxifolia</i>	Box-leaf Wattle	1-4m, dry soils, widespread
<i>Acacia dealbata</i>	Silver Wattle	Shrub or tree to 30m, variety of soils
<i>Acacia decora</i>	Western Silver Wattle	1-4m, variety of soils including rocky situations
<i>Acacia falciformis</i>	Broad-leaved Hickory Wattle	2-10 m high, situated in a variety of habitats including moist rocky slopes, gullies and along watercourses.
<i>Acacia falcata</i>	Hickory Wattle	Tree grows to 2-5m, free draining loams
<i>Acacia fimbriata</i>	Fringed Wattle	Shrub to 7m
<i>Acacia hakeoides</i>	Hakea Wattle	Shrub 1-6m, widespread sandy soils
<i>Acacia implexa</i>	Black Wattle	Shrub or tree 5-12m, variety of soils
<i>Acacia melanoxylon</i>	Blackwood Wattle	Shrub or tree 6 - 30m, moist soils at higher altitudes
<i>Acacia paradoxa</i>	Kangaroo Thorn	1-4m, variety of soils, widespread
<i>Acacia spectabilis</i>	Mudgee Wattle	Shrub, 1-4m, sandy or gravelly soils
<i>Acacia vestita</i>	Hairy Wattle	Rounded shrub, 1-4m, variety of soils or sheltered gullies
<i>Callistemon citrinus</i>	Crimson Bottlebrush	1-3m, swamps & rocky watercourses
<i>Callistemon sieberi</i>	Sugar candy Bottlebrush	Shrub 2-6 m tall. Will tolerate drought, neglect and hard frosts. Prefers a wet spot in a range of soils.
<i>Dodonaea viscosa 'angustifolia'</i>	Sticky Hop Bush	To 5m, variety of soils including rocky situations
<i>Hakea sericea</i>	Bushy Needle Wood	Shrub grows 2-5m, free draining soils
<i>Hakea salicifolia subsp angustifolia</i>	Willow Leaved Hakea	Shrub grows to 8m, most free draining soils

<i>Leptospermum obovatum</i>	River Tea Tree	2 - 4m, swamps & rocky streams
<i>Leptospermum polygalifolium</i>	Yellow Tea-tree	Tall shrub, usually dry alluvial sand or rocky watercourses
<i>Melaleuca linariifolia</i>	Snow in Summer	Shrub or small tree to 8m high

TREES		
<i>Angophora floribunda</i>	Rough Barked Apple	To 30m, deep free draining soils
<i>Brachychiton populneus</i>	Kurrajong	To 20m, sandy loams, good shade & fodder tree
<i>Casuarina cunninghamiana</i>	River She-oak	15-30m, naturally along watercourses. Reliable in damp or well drained soils
<i>Eucalyptus albens</i>	White Box	To 25m, various fertile soils
<i>Eucalyptus blakelyi</i>	Blakely's Red Gum	To 20m, various moderately fertile soils, also at altitude
<i>Eucalyptus bridgesiana</i>	Apple Box	To 20m, favors drier sites on heavier alluvial soils
<i>Eucalyptus camaldulensis</i>	River Red Gum	To 35m, rich soil, permanent water, west of Mudgee
<i>Eucalyptus conica</i>	Fuzzy Box	To 20m, light loamy moderately fertile soils
<i>Eucalyptus crebra</i>	Narrow-leaved Ironbark	To 30m, shallow sandy soils, widespread
<i>Eucalyptus dalrympleana</i>	Mountain Gum	To 40m, widespread on loamy or sandy soils at higher elevations.
<i>Eucalyptus dawsonii</i>	Slaty Gum	20-40m tall tree, loamy soils of moderate fertility.
<i>Eucalyptus dealbata</i>	Tumble-down Red Gum	To 15m, skeletal soils
<i>Eucalyptus fibrosa</i>	Broad-leaved Ironbark	To 35m, shallow infertile soils
<i>Eucalyptus goniocalyx</i>	Bundy Box	To 15m, grows in woodland, usually on hilly, rocky ridges and is widespread south of Mudgee
<i>Eucalyptus macrorhyncha</i>	Red Stringybark	Tree grows 8-18m, poor soils
<i>Eucalyptus melliodora</i>	Yellow Box	To 30m, mod. fertile sandy/alluvial soils, grassy woodland
<i>Eucalyptus microcarpa</i>	Western Grey Box	To 25m, loamy soils of moderate fertility
<i>Eucalyptus polyanthemus</i>	Red Box	To 20m, light shallow soils, widespread
<i>Eucalyptus punctata</i>	Grey Gum	To 35m, soils of low to moderate fertility
<i>Eucalyptus rossii</i>	Scribbly Gum	To 20m, poor shallow stony soils
<i>Eucalyptus rubida</i>	Candle Bark	To 40m, moderately fertile soils on frosted flats.
<i>Eucalyptus sideroxylon</i>	Mugga Ironbark	To 35m, light poor soils
<i>Eucalyptus stellulata</i>	Black Sally	To 15m, fertile loamy soils on cold flats at altitude
<i>Eucalyptus viminalis</i>	Ribbon/Manna Gum	To 50m, fertile loams, also at higher altitudes
